

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience in **Java (Spring Boot), Node.js, and React.js**, building scalable web and cloud applications. Experienced in **REST/GraphQL APIs, microservices, and Kafka streaming pipelines**, with hands-on expertise in **MERN stack development**, AI integrations, and data-driven analytics dashboards. Skilled in **AWS, Docker, Kubernetes, and CI/CD automation**, implementing secure solutions with **OAuth2/JWT** and optimizing backend performance. Adept at translating business requirements into reliable, high-performing software that supports clinical and enterprise decision-making.

TECHNICAL SKILLS

- Programming & Scripting:** Java, Python, JavaScript (ES6+), TypeScript, SQL, Bash, C# (.NET Core)
- Backend Engineering:** Spring Boot, FastAPI, Flask, Node.js, Express.js, ASP.NET Core, Microservices, GraphQL, gRPC
- Frontend Development:** React.js, Next.js, HTML5, CSS3, JavaScript, Tailwind CSS, Material UI
- Cloud & DevOps:** AWS (EC2, Lambda, S3, RDS), Azure, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, CI/CD Automation
- Messaging & Streaming:** Apache Kafka, Kafka Streams, SQS
- Databases:** PostgreSQL, MySQL, MongoDB, Redis, DynamoDB
- Monitoring:** AWS CloudWatch, ELK Stack, Prometheus, Grafana
- Tools & Methodologies:** Git, GitHub, Bitbucket, Jira, Confluence, Agile/Scrum

PROFESSIONAL EXPERIENCE

Tempus, USA | Full Stack Web Developer

Aug 2024 – Present

- Built and maintained **5 backend services** using **Spring Boot** to process **1000+ patient records daily** from EMR, LIS, and HIE systems, ensuring accurate clinical data flow, optimizing service reliability, and supporting real-time decision-making for hospital staff.
- Developed **3 React.js modules** supporting **200+ hospital staff users**, improving workflow efficiency and patient data accessibility while enhancing UI performance with component reuse and caching strategies.
- Deployed **7 microservices** on **AWS Lambda** using Docker and Kubernetes, integrating automated CI/CD pipelines with GitHub Actions to streamline daily deployments and improve system uptime and scalability.
- Designed **Kafka-based streaming pipelines** processing **1000+ clinical events per hour**, enabling real-time analytics and operational dashboards while ensuring reliable data delivery across multiple partner systems.
- Authored **5 integration playbooks and API guides** and implemented **OAuth2/JWT security**, standardizing onboarding and integration procedures to ensure secure and compliant data exchange across partner systems.

Infosys, India | Software Developer

Apr 2022 – Jun 2023

- Participated in **design and development of 4 Java Spring Boot microservices**, translating functional and non-functional requirements into efficient backend solutions handling over **20,000 daily transactions**.
- Built **3 React.js modules** for enterprise applications, improving **workflow efficiency for 150+ business users** and implementing responsive interfaces that reduced navigation time across key screens.
- Collaborated with **project managers and business analysts** to gather detailed requirements, estimate tasks, and deliver **3 client-facing modules** within project timelines while adhering to Agile processes.
- Wrote **50+ unit and integration test cases** using JUnit and Selenium based on system specifications, improving code reliability and supporting SDLC quality standards.
- Gained hands-on exposure to **C# and ASP.NET Core** while assisting the team with debugging API endpoints and validating backend workflows for internal enterprise modules.
- Assisted in **performance tuning and debugging** of backend services, reducing average API response times and ensuring consistent availability for **10,000+ daily requests**.

Infosys, India | Associate Software Developer

Jan 2021 – Mar 2022

- Assisted in building **frontend components** using **React.js, JavaScript, HTML5, and CSS3**, contributing to improved UI consistency and responsiveness across multiple screens.
- Supported development of **Node.js + Express APIs** with **MongoDB**, helping with data integration tasks and ensuring smooth interaction between frontend and backend modules.
- Participated in **team code reviews and testing** using Jest and Cypress, helping improve code quality and gain hands-on experience with automated testing.
- Learned and contributed to **CI/CD workflows** using Bash scripts and GitHub Actions, assisting the team in preparing deployments and managing version control.
- Explored **.NET Core fundamentals** during internal training sessions, strengthening backend concepts and applying them in small debugging and integration tasks.
- Collaborated with mentors to **debug issues and optimize small backend queries**, gaining exposure to performance considerations and real-world application workflows.

EDUCATION

Master of Science in Computer Science
University of South Florida, Tampa, FL

Bachelor of Technology in Computer Science Engineering
PVPSIT, Vijayawada, India

CERTIFICATIONS

- [AWS Certified Cloud Practitioner](#)
- [Google Data Analytics Professional Certificate](#)
- AWS Academy Graduate – Cloud Foundations
- AWS Academy Graduate – Machine Learning Foundations
